<p align="center"><i>PESTICIDE APPLICATION</i></p>	<p>Approved: 11/25/2003</p>	<p>Policy No. 3-613</p>
<p><u>Pesticide Application</u></p> <p>In an attempt to assure proper control of any pesticides or other harmful chemicals, which might be used or stored on district premises, these procedures are established. To fulfill statutory requirements, “pesticide” is defined as a fungicide used on plants, an insecticide, a herbicide, or a rodenticide but does not mean a sanitizer, disinfectant, antimicrobial agent or a pesticide bait.</p> <p>The intent is to prevent unnecessary exposure of staff, students or the public to potentially harmful substances.</p> <ol style="list-style-type: none"> 1. On or after July 1, 2000, only certified pesticide applicators shall be used in schools (vocational agricultural schools exempted) for any non-emergency pesticide use in school buildings or on school grounds. 2. An emergency application of pesticides is defined as when an application of pesticides is necessary to eliminate an immediate threat to human health and where it is impractical to obtain the services of a certified pesticide applicator provided such emergency application does not involve a restricted use pesticide as defined in CGS 22a-47. Restricted use pesticides may be used only by certified applicators or under their direct supervision. <i>(Note: Restricted use pesticides, classified by the Federal Environmental Protection Agency or the DEP are those which may present a hazard to the applicator or other people by reason of acute dermal or inhalation toxicity or which may have an unreasonable adverse effect on the environment.)</i> 3. On or after July 1, 2000, at the beginning of each school year, the Board of Education shall provide the staff of each school and the parents/guardians of each child enrolled in each school with a written statement of the Board’s policy on pesticide applications and a description of any pesticide applications made at the school during the previous school year. Such statements and descriptions shall also be provided to the parents/guardians of any child who transfers to a school during the school year. 4. The aforementioned required statement shall indicate to staff, parents and guardians that they may register for prior notice of school pesticide applications. Further, the emergency notification procedures to be used will be described.

<ol style="list-style-type: none"> 5. On or after July 1, 2000, parents/guardians and staff may register for prior notice of pesticide applications. Each school shall maintain a registry of persons requesting such notice. Prior to the application of pesticides within any building or on school grounds, the parents/guardians who have registered for prior notice shall receive a mailing to be received no later than 24 hours prior to the application. Staff who have registered for such notice shall be notified by any means practicable. 6. The aforementioned notice shall include the (1) name of the active ingredient of the pesticide to be applied, (2) the target pest, (3) location of the application, (4) date of application, (5) the name of the school administrator or his/her designee who may be contacted for further information. 7. No application of pesticide, after July 1, 2000, may be made in any building or on school grounds during regular school hours or during planned activities at the school except for an emergency application. 8. If an emergency application is necessary to eliminate an immediate threat to human health, such application shall not involve a restricted use pesticide and no child may enter the area of such application until it is safe to do so according to the provisions on the pesticide label. 9. In cases of an emergency application, effective July 1, 2000, prior notice is not necessary except that on or before the day the application is to take place, prior notice is given to those persons who have previously requested such notice. 10. A copy of the records of each pesticide application at a school shall be maintained for five years. 11. Potentially harmful substances such as insecticides, fungicides, herbicides, rodenticides or other pesticides shall be chosen for the low levels of toxicity. The least toxic formulations and safest methods of application will be selected when there is a choice of products with comparable effectiveness. Whenever practical, non-chemical controls shall be used. 12. Storage of harmful products will be kept to a minimum. Only enough of the product for a given application shall be purchased. All storage instructions will be followed explicitly. All such products and the application equipment will be stored away from other activities and especially separated from food products or occupied rooms. All storage facilities will be maintained as a locked area

<p>and clearly marked as containing pesticides.</p> <ol style="list-style-type: none"> 13. All pesticide products will have complete label instructions, will remain in the original container and the Material Safety Data Sheet will be on file and readily available to any employee who must handle such materials or who may have been exposed to the product. This information shall also be available to any member of the public upon request. 14. All applications of harmful products will be made in strict compliance with label instructions and under no circumstances will the product concentrations exceed those specified in the application instructions. 15. Prior to application of any harmful substance, a written plan for that application will be filed in the district's business office and approved by the <i>Director of Buildings and Grounds/ Business Manager/Supervisor of Maintenance</i>. 16. The plan will contain the purpose of the application, product to be used, formulation of the product, location and extent of the area to be treated, type of equipment to be used, date and time of application, and amount of the product to be used. Any warnings that would restrict use of the area following such application also will be part of the plan and will be appropriately posted to notify the public. 17. Treated school grounds will be posted as indicated in the following section. 18. District employees responsible for handling and applying pesticides shall have specific pesticide training. After July 1, 2000, only certified pesticide applicators may be used. 19. When the district contracts with a private, state-licensed pest control company, such contractors will be subject to regulations as defined in state statutes. <p>The Superintendent (<i>Director of Maintenance, Head Custodian, Principal</i>) shall be the contact person for providing information regarding pesticide application activities at the school site, including but not limited to giving oral and written notification, supervising the posting of notifications as required and maintaining records of pesticide-application notifications.</p>
